Inspired by the work of Dr. Thomas, the Vivien Thomas Scholars Initiative (VTSI) is dedicated to nurturing, mentoring, and connecting the next generation of leaders in STEM at historically black colleges and universities and minority-serving institutions.

As Vivien Thomas Scholars at Johns Hopkins University, students are empowered to grow in discovery and lead in their fields while earning their PhD in one of over 30 programs.

Welcome from Dr. Avery August

On behalf of the Steering Committee for Annual Biomedical Research Conference for Minoritized Scientists (ABRCMS), and the American Society for Microbiology, I would like to extend a sincere welcome to ABRCMS 2022. I am so excited that we are back in person after two years of virtual meetings due to the COVID-19 pandemic. And although we are in a different phase of the pandemic, the scientific advances in virology and immunology led to the rapid development of vaccines, allowing us to be able to return to many of the in person activities we value.

Our theme this year “Celebrating 20 Years of Building Community to Innovate in Biomedical and Behavioral Science Research,” tells a story of ABRCMS working to create a truly inclusive community of scientists who are historically excluded, meeting, talking about science, and supporting each other. Since our first meeting in 2001, ABRCMS has been a place where we inspire and support the careers of leaders who are the future of a more diverse scientific enterprise. Starting with a focus on undergraduate students, we are now a thriving community of scientists at all career stages. We welcome those of you for whom this is your first time at ABRCMS, and I know that once you experience our community, this won’t be your last.

The core of ABRCMS, and our theme, is “community.” Our community is where you will be able to interact over front line science, from plenary speakers Dr. Carolyn Ruth Bertozzi, a renowned chemist and Nobel laureate, known for her wide-ranging work spanning both chemistry and biology, to Dr. Maria Elena Bottazzi, an emerging disease vaccinologist and global health advocate, to Dr. Mae Jemison, NASA Astronaut and first woman of color in the world to go into space, to Dr. Olajide Williams, Neurologist and co-Founder and President of Hip Hop Public Health. They are joined by a number of accomplished speakers presenting a series of leading edge scientific expert talks, along with a wide range of professional development programs to meet the many needs of our participants, no matter your career stage. I am especially looking forward to the dynamism of the conference, the nervous excitement of those presenting for the first time, not knowing what to expect, but coming to the realization that they are being welcomed to our supportive scientific community.

Join our community in taking in all that we have prepared for you. Network like you haven’t done in two years, literally. Engage with the speakers and presenters, visit with the exhibitors, mentor and be mentored, support and be supported, because ABRCMS built this scientific community us.

The ABRCMS Steering Committee, the ASM staff, and the exhibitors have worked hard to deliver everything you see during your time here. Many volunteer judges, presenters, convention center support staff are all here doing a remarkable job to make this meeting possible. I would like to thank them all in advance for all their hard work making this conference a success. And as always, we are eternally grateful for the continued support of Division of Training, Workforce Development, and Diversity at the National Institute of General Medical Sciences, NIH, whose funding has continued to make ABRCMS what it is.

With my warmest wishes

Avery August, Ph.D.
Chairperson, ABRCMS
Greetings from NIH

On behalf of the National Institutes of Health’s National Institute of General Medical Sciences (NIGMS), we would like to welcome you to the 2022 Annual Biomedical Research Conference for Minoritized Scientists. We are very proud to support this meeting, which brings together a community of outstanding scientists for stimulating discussions of research, careers, and more.

This meeting is one element of our many activities in the areas of training, workforce development, diversity, and research capacity building. Our NIGMS programs range from the high school level through the undergraduate, graduate, postdoctoral and faculty levels. For example, we support an array of programs to enhance diversity in the biomedical research workforce including Science Education Partnership Awards, Bridges to the Baccalaureate, Building Infrastructure Leading to Diversity, Maximizing Access to Research Careers, Research Training Initiative for Scientific Enhancement, Initiative for Maximizing Student Development, Postbaccalaureate Research Education, Bridges to the Doctorate, Institutional Research and Academic Career Development Awards, Maximizing Opportunities for Scientific and Academic Independent Careers, the Diversity Supplement Program, the Native American Research Centers for Health, the Support for Research Excellence Programs, and the National Research Mentoring Network.

For those of you who are attending as mentors and sponsors, we truly appreciate your dedication and many contributions to your students and our shared goals. For those of you still in training, we hope that your involvement in this meeting further inspires and motivates you to pursue careers and leadership positions in the biomedical research workforce and leadership roles in biomedical science. During your time here, you will gain important allies for your future: a community of peers who will become your colleagues and friends as well as a network of scientists and mentors who are deeply committed to your success in pursuit of a research doctorate and a career in the biomedical research workforce.

We encourage you to make the most of the meeting and take every advantage of the resources and opportunities it offers to help you prepare for the next stages of your research career. We look forward to seeing your presentations and talking to you over the course of the next few days.

Sincerely,
Jon R. Lorsch, Ph.D.

Celebrating 20 Years of Building Community to Innovate in Biomedical and Behavioral Science Research
20th Anniversary Highlights

Celebrating 20 years of ABRCMS
For more than 20 years, ABRCMS has been the go-to conference for underrepresented groups in STEM – providing a safe space for learning, sharing and connecting with one another.

While ABRCMS officially hit its 20th year in 2021, there’s no better time to celebrate with our community than now and in-person, as we rebuild and reenergize after the last two years.

We are so glad to have you all here and hope that you enjoy the celebration we have in store!

ABRCMS Graduate Symposium
ABRCMS is excited to launch the inaugural ABRCMS Graduate Symposium this year, taking place November 8-9. The Graduate Symposium is designed for graduate students, in one of our 12 STEM disciplines, at the master’s and doctoral-level, and provides a unique opportunity for graduate students to highlight their research in oral presentations, strengthen their professional development skills, and build their scientific networks among STEM and career professionals.

Welcome to the graduate students who are part of this groundbreaking ABRCMS event!

ePosters
Check out the student ePoster virtual session, which will be available to all attendees on Saturday, November 12, from 9:30 a.m. – 11:30 a.m., via the conference app.

ABRCMS365
Your ABRCMS experience no longer has to end on the last day of the conference. ABRCMS365 is an extension of the conference that allows you and your students to continue learning, with webinars that explore professional development, diversity, and scientific topics.
