REMARKS FROM ASM CEO

Dear ABRCMS 2026 Attendees,

Welcome to ABRCMS 2026. For more than two decades, this conference has helped students and early-career researchers in science, technology, engineering, and mathematics (STEM) find community, pursue new opportunities, and envision their place in the future of science — particularly those from backgrounds with historically limited access to research.

Over the coming days, community college, undergraduate, and graduate students will share their research, build relationships with mentors and peers, and develop skills that will support their academic and professional journeys. The conference again brings together thousands of students, faculty, program administrators, and STEM professionals from across the country.

ABRCMS helps shape the future of science by opening doors for talented students who might not otherwise see a place for themselves in the scientific community. Scientific progress depends on bringing together people whose distinct perspectives and experiences can illuminate complex challenges in new ways. That's why we are committed to ensuring that everyone who wants to contribute to science can develop their talents and find their place within the scientific ecosystem.

ABRCMS is one of the highlights of my year because it gives me the chance to see the future of science taking shape. I'm always struck by the curiosity, creativity, and talent participants bring, and by what becomes possible when emerging scientists have the encouragement and support to thrive. I look forward to meeting many of you this year and hearing about the ideas, questions, and aspirations that brought you here.

ASM has stood behind ABRCMS through periods of uncertain funding because we believe deeply in what this community makes possible. By helping emerging researchers grow, share their perspectives, and contribute to science, ABRCMS brings ASM's mission to life and strengthens the scientific enterprise for all.

ABRCMS's influence extends well beyond the conference. Thousands of alumni have pursued advanced degrees and research careers, with many now leading across academia, government, and industry. For today's participants, the confidence and connections built here can be just as enduring.

As we gather for ABRCMS 2026, I encourage you to embrace the ideas, relationships, and opportunities this community offers. ASM is working to secure the partnerships and sustainable funding needed to carry the conference forward. I hope you leave energized by what you have learned, proud of what you have shared, and confident in what comes next.

With gratitude and optimism,

Stefano Bertuzzi, Ph.D., MPH
Chief Executive Officer
ASM

Dear ABRCMS Community,

On behalf of the Steering Committee for ABRCMS and the ASM, welcome to Seattle and to ABRCMS 2026!

This year is a defining milestone for ABRCMS as we celebrate 25 years of bringing nearly 95,000 students, administrators, faculty, and scientists together. Twenty-five years of building connections that have shaped careers, strengthened communities, and helped build the scientific workforce of today and tomorrow. We are exceptionally proud that the commitment of ABRCMS to invest in our future has led to so many successful careers from so many communities, broadening those who participate in science.

Celebrating this 25-year milestone of ABRCMS is about more than this long record of success, it's really about the people who made those 25 years possible.

It's not just a meeting — it's a community. One that says loud and clear: You belong here. ABRCMS is where you will find mentors and a network of support — peers, faculty, educators.

This year, you're not simply attending four days of cutting-edge science, professional development, and inspiring talks and conversations. You're becoming part of a 25-year legacy built on learning, presenting research, growing professionally, and creating lasting connections. Whether it's your first ABRCMS or one of many, your participation is what makes this community thrive.

ABRCMS is also a movement. Your experiences, perspective, and dreams are essential to the discoveries that will heal, innovate, and inspire others.

We know the path to a science, technology, engineering and mathematics (STEM) career can sometimes feel uncertain. Yet, as you look around this week at the packed conference rooms and hallways you will see people who share your passion for discovery and your commitment to making a difference. The ABRCMS and ASM team, exhibitors, volunteer judges, presenters, vendors, and convention center support staff all work to make this difference. And we are eternally grateful for the 25 years of continued support of ASM that has made ABRCMS what it is. Together, this community has the power to shape the next 25 years of science.

With gratitude and excitement,

Avery August, Ph.D.
Chairperson, ABRCMS
Professor, Cornell University College of Veterinary Medicine

Mary Sánchez Lanier, Ph.D.
Vice Chairperson, ABRCMS
Professor, Washington State University

Irene Hulede
Project Director, ABRCMS
Education Director, ASM

2027 ASM Career and Professional Development Webinars

Your Remote Hub for Professional Development and Scientific Skills Building for Trainees

Whether you're just starting out or building on existing experience, the ASM Virtual Professional Development and Scientific Webinar Series offers tools and strategies to help community college students to postdoctoral scientists advance in the microbial sciences. Develop valuable, real-world skills in science communication, goal setting, time management, grant writing and more — all online, just a click away.

Learn More

Explore Career Pathways in the Microbial Sciences

For ASM members, Career Pathways in Microbiology is a webinar series with scientists sharing the available roles, necessary experience and skills needed to enter the field and where to look for job openings. Learn about careers in industry/biotechnology, non-profits, foundations, academia and more!

Learn More

Faculty Professional Development Learning Communities & Webinars

Advance your research and teaching skills with upcoming learning communities and webinars for current and future faculty. In 2027, we will offer online programs on course design to re-think microbiology courses, faculty learning communities and the ASM/NMDC Microbiome Certificate Program.

ALFRED P. SLOAN FOUNDATION

Thank You To Our Donors

Over the last two years, our community has rallied to protect progress and support the next generation of scientists through generous donations and advocacy. We're deeply grateful to everyone who gave, shared, and stood with ABRCMS.

Since launching the ABRCMS Giving Portal, we've received overwhelming support from over 500 donors in our community. Your generosity, advocacy, and belief in ABRCMS help ensure we can continue fueling the scientific workforce for the next 25 years.

We are profoundly grateful for your investment in our community.

MEDICAL COLLEGE OF WISCONSIN

CARDIOVASCULAR RESEARCH CENTER

Training Programs in Cardiovascular Science & Medicine

Summer Undergrad Research Programs:

- **Stipend** $6,000 for the summer
- **Housing** for non-local participants
- **Transport** roundtrip to/from the program

Physician-Scientist Immersion Program for Medical Residents (NIH R38):

- **Stipend** based on PGY
- **Travel** funding for a scientific conference

Postdoctoral Fellowship (NIH T32):

- **Stipend** based on PGY
- **Travel** funding for a scientific conference
- **Childcare** stipend for dependents

GRADS-4C NATIONAL COMMUNITY

COMPUTE. COLLABORATE. DISCOVER.

Advancing computational genomics through data science, artificial intelligence, and cloud-enabled research.

WHY JOIN GRADS-4C?

GRADS-4C connects students, faculty, educators, researchers, and partners advancing computational genomics, data science, artificial intelligence, and cloud computing. Build skills, expand collaborations, and accelerate research that advances human health and scientific discovery.

JOIN THE COMMUNITY
A national network for interdisciplinary learning, research, and workforce development.

Develop In-Demand Skills 01

Hands-on workshops, webinars, guest lectures, and specialized training in genomics, bioinformatics, data science, AI, and cloud computing.

Advance Education and Discovery 02

Access cloud-based learning and research environments, instructional materials, and expert guidance to support classroom innovation and data-driven discovery.

Access Funding Opportunities 03

Non-renewable awards of $5,000-$20,000. Five to ten awards per year support training, research, cloud resources, data access, storage, and publication.

Build Collaborations 04

Connect with students, faculty, researchers, educators, healthcare professionals, industry, community colleges, and nonprofit partners.

Leverage NIH Cloud Platforms 05

Access training and resources through NIH-supported AnVIL and ScHARe platforms for research and workforce development.

Showcase Your Work 06

Present research, exchange ideas, and expand your network through workshops, seminars, and the annual research symposium.

THERE IS A PLACE FOR YOU IN GRADS-4C

Learn, collaborate, share expertise, mentor talent, and partner on research.

CONNECT. LEARN. COLLABORATE. LEAD.

ASM Journals

ASM Journals welcomes submissions from researchers across the world at all stages of their career. Authors trust us to handle their research with fairness, integrity and focus on the best science to advance the microbial sciences.

- **86% Research Articles Cited** within 2 Years of Publication
- ASM Articles **Account for 16% of All Articles in the Microbiology Category***
- Just Over a Month to First Peer Review Decision
- **69 Million** Total Annual Full-Text Views/Downloads
- ASM Journals Represent 20% of All Microbiology Citations

Growing Demand for Inclusive STEM Spaces Over 25 Years

The sustained growth of ABRCMS is a powerful reflection of the ongoing demand for spaces that celebrate, support, and elevate all students at the earliest stages of their scientific journey.

Students describe ABRCMS in three words:

1	2	3
inspiring	authentic	powerful
empowering	healing	impactful
needed	rare	refreshing
welcoming	invigorating	fun
big	friendly	diverse

Students

- Gain professional development opportunities
- Seek out future research opportunities
- Gain confidence and motivation to become a scientist
- Will stay in science
- Participate in formal/informal mentorship experiences
- Consistently attend from year to year from multiple scientific disciplines

Faculty & Mentors

- Perceive research presentations as high quality
- Self-reported that they were able to establish networking relationships

Exhibitors

- Perceive ABRCMS as worthwhile
- Perceive ABRCMS was a good return on investment

Key Facts

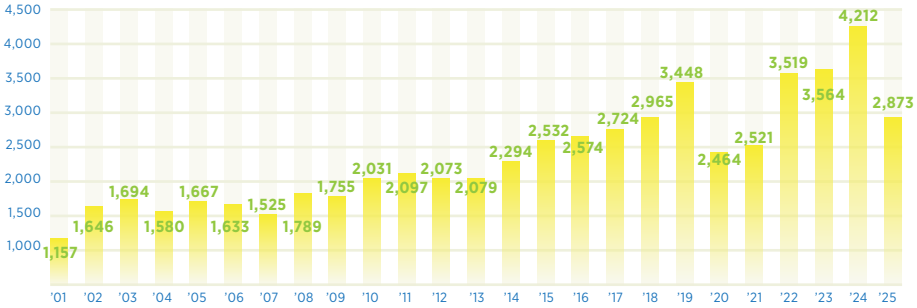

NIH (NIGMS) Support of **5 cycles** of funding

Held in **15 cities** in Continental US

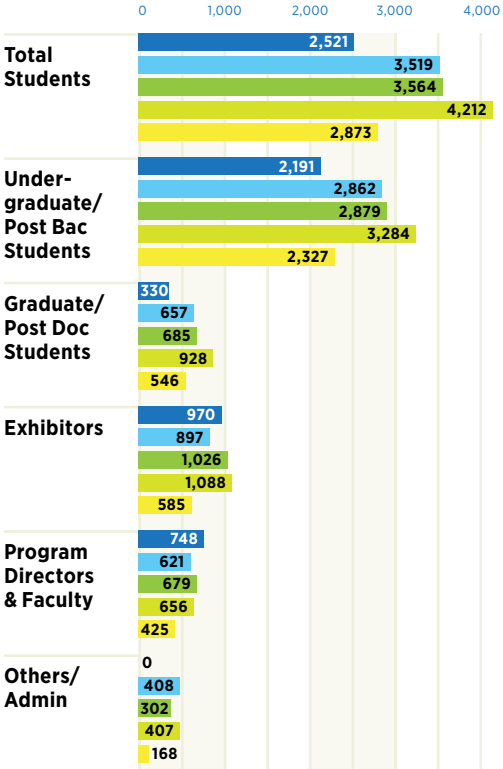

3,485 Institutions represented on average

Sample of keynote speakers:

Growth: Total Student Attendance 2001–2025

Type of Attendee 2021–2025

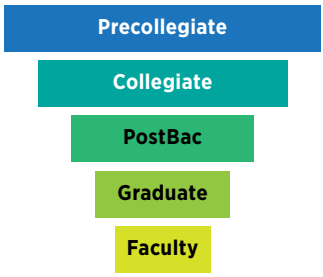

Total Attendees 2021–2025

Year	Total Attendees
2021	4,239
2022	5,981*
2023	6,027*
2024	6,822*
2025	4,051

*Includes all ABRCMS programs (hybrid conference, ePoster Spring Symposium for Emerging Scientists, Graduate Symposium, and ABRCMS365)

Reach & Milestones

91,814 attendees in 24 years

Largest attended research conference among peer convenings

Majority of exhibitors (>80%) **return** each year

Freeman Hrabowski III, Mae Jemison, Arthur Leonard Kaplan, Maya Angelou, Francis Collins

Help Power Tomorrow's Scientific Workforce. Give to ABRCMS Today.

Together, we can rise to today's challenges and keep the ABRCMS mission thriving — your bold support makes all the difference!

Why ABRCMS?

STEM careers are driving solutions to the world's most urgent challenges. To meet the growing demand for innovation and talent, we need programs and resources that foster academic excellence and expand students' exposure to diverse career pathways.

See the Impact of ABRCMS!

Download our report to see highlights of key data, alumni stories and more!

Why Your Gift Matters

Your contribution to ABRCMS directly supports the people, programs, and partnerships supporting the workforce development of the next generation of scientific leaders.

Join Our Supporters and Donate Today

Our 25th anniversary is a pivotal moment to help secure the future of ABRCMS. Together, we can meet today's challenges and keep our mission moving forward. Every gift, no matter the size, makes a difference.
